Subject: Emergencies and MSDS

All,
In the event of an injury, you are to disregard the UMass flip chart regarding the consultation with New England Baptist. You are to call 911 and seek emergency treatment, at the closest emergency room. That would be the Faulkner behind the Arboretum.

I have replaced about 25 of the lost MSDS forms. They are in the second drawer of the green cabinet next to my desk in the "Chemist's Office." These are the most dangerous materials in the lab. In the even of an exposure, the correct MSDS should be brought to the emergency room with the patient.

Mike Lawler
Safety Officer
